Web developer

Motivated and detail-oriented MCA student with a strong foundation in full-stack web development, specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive and efficient web applications using HTML, CSS, JavaScript, and modern frameworks. Passionate about solving real-world problems through clean, scalable code and intuitive user interfaces. Continuously learning and enhancing skills through hands-on projects and structured practice. Seeking an opportunity to contribute to innovative development teams and grow as a professional full-stack developer.

EDUCATION

MCA (Master in Computer Application)

Indira Gandhi Institute Of Technology, Sarang

Dhenkanal • 09/2024 – Present

BSC In Computer Science

Udayanath Autonomous College Of Science & Technology •
GPA: 7.58 CGPA

Cuttack •
09/2021 – 04/2024

PROJECTS

Password Vault Pro

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Developed a secure and responsive full-stack web application that enables users to manage their passwords efficiently. The application allows users to add, view, and delete credentials associated with various websites. Utilized Tailwind CSS for building a clean and modern user interface, and implemented RESTful APIs with Express.js and Node.js for seamless data handling. Integrated MongoDB for reliable and scalable data storage, ensuring a smooth user experience with structured password management.

Finance Manager

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Chart.js

Developed a secure and feature-rich full-stack finance management application with user authentication and authorization. The platform allows users to add, update, and delete income/expense entries while offering intuitive dashboards for real-time financial tracking. Integrated charts and analytics using Chart.js to visualize spending patterns, including filters and recent 5-day summaries. Tailwind CSS was used for building a responsive and modern UI, while Express.js and MongoDB powered backend APIs and data storage, ensuring seamless and secure user-specific access.
